1. Pre-Departure Cultural Questionnaire

2. In-Class Interviews, Conversation Activities, and Cultural Observations

1. Mid-Term Reflection on their Original Goals

1. End-of-Program Evaluation on the validity of this activity

1. Video Recordings of Host Family Interviews
Interview Instructions for Students

- Over the course of this program, you will choose one host family member and conduct 3 interviews---one interview during the first week of the program, one during the second week, and finally one during the third week. During the last week, you will reflect upon your interviews in a separate activity.

- For each week, you will be asking your host family member 2 questions; their responses should be approximately 2 minutes per question. During the first two weeks, you will be provided with the interview questions. During the final week, you will need to create your own 2 questions. (more details will follow on how to create these questions)

- You will video-record these interviews (3) and upload them to your e-portfolio. You should house these videos under the category of REFLECTIONS.
Week 1  (due date: Friday, June 30\textsuperscript{th})

- Describe a typical day for you.

- Describe what you do during a holiday or a special day for you or your family (Christmas, Reyes, birthday, your Saint Day)
Week 2 (due date: Friday, July 7th)

- Compare your generation with your parent’s generation or Compare your generation with your children’s generation.

- If you had to describe your culture to someone who is not acquainted with your culture, how would you describe it? (If the person is from the Basque region you may also ask, what is it to be Basque?)
This week it is your turn to create the questions that you will ask one of your family members. The only requirement is that ONE of the two questions MUST be a ‘cláusula con si’ (any type).

CONCLUSION: STUDENTS’ REACTIONS and REFLECTIONS

- Please describe three things that you learned about your host family by conducting these interviews.

- If you were to describe the goal or purpose of the E-portfolio and interview activity, what would that be?

- For future programs, do you have any suggestions of how this activity can be improved.
Conclusion

- The students needed to conduct the interviews with an already heavy workload
- Some had trouble uploading video to portfolio (due to the length of the video) but we had technical support on our home campus who were able to resolve some of these issues

- Students did engage in more meaningful conversations with a family member/s
- Reinforced academic knowledge with real world experiences (Civil War....someone who actually lived the experience)
- The activity acted as a spring-board to other conversations
- Gave the students guidance but then they created which is empowering
- They had a perfect excuse to get the conversation going: “The teacher wants us to do this activity”
- Their reaction was positive and they recognized the validity of activity
- The portfolio and the interviews are an archive of the abroad experience
